Collection

Applications

Interior blinds. facade blinds (Soltis Opaque B92 and B99).
glass and veranda blinds. drop-arm awnings

■ Choosing the degree of opacity

- A solution tailored to your needs:
- Total opacity: Soltis Opaque B92
 - Maximum degree of opacity above 100.000 lux
 - Ideal for areas most sensitive to light: conserving works of art, radiology or photography laboratories, etc.
 - Darkening: Soltis Opaque B99, B990 and B702

■ High performance screens

- Soltis Opaque B92
 - No detectable transmission of visible light, infrared or UV rays
 - Resists climatic degradation when used outdoors
- Soltis Opaque B702
 - thermal comfort and darkening: the white surface reflects heat, the black surface darkens the room.
- Soltis Opaque B99 et B990
 - Indoor applications only
 - Light and thin for easy and discreet installation.

■ Colour synergy

- Colours coordinated with other Soltis ranges
- Perfect building harmony
- New white / white version: Soltis Opaque B990 (combining thermal comfort and design).

■ Exclusive Preconstraint® technology

This unique globally patented technology consists of maintaining the composite in bi-axial tension throughout the manufacturing cycle. This gives our materials outstanding performance allowing them to surpass market standards in terms of dimensional stability, mechanical strength, coating thickness and flatness.

Community High tenacity polyester micro-cable reinforcement	①	Superior resistance to elongation and tearing
Coating under bi-axial tension, exerted in warp and weft	②	No deformation during implementation and use
Superior coating of the wire bundle and anti-soiling surface treatment	③	Superior aesthetic and mechanical durability
Extreme flatness and low thickness	④	Smooth surface easy to clean, small footprint and easy winding

■ Solar and light properties (according to EN 14501)

B : Coloured surface exposed to the sun
g_{tot}^e : External Solar Factor
g_{tot}^i : Indoor Solar Factor

* Detailed
EN 13363-2 method

Takes into account the spectral values of glazing transmission and reflection + blind complex for calculating the solar factor g_{tot} .
Type 'D' glazing: insulating double glazing with low emissivity on surface 2 (4 + 16 + 4; Argon filling)
 $g = 0.32 - U = 1.1$
